Johannes Schweizer
Trailblazer Summits

Host

Steffi Landerer
Trailblazer Summits

LOGISTICS
SUMMIT MAIN
STAGE

09:30 “Smart to POS” | Sustainable city logistics, tailored to the point of sale

Suspended shipping at DACHSER, sustainably implemented

PRESENTATION

Uwe Riechel
DACHSER SE

Host

Steffi Landerer
Trailblazer Summits

LOGISTICS
SUMMIT MAIN
STAGE

10:00 Coffee break

Enjoy coffee and breakfast and make new contacts with the visitors and exhibitors at the Logistics Summit.

LOGISTICS
SUMMIT MAIN
STAGE

10:30 Book & Claim as a lever for decarbonization in logistics

PRESENTATION

Fabian Höpfner
Shell

**LOGISTICS
SUMMIT MAIN
STAGE**
PANEL
DISCUSSION

11:00 Shipper panel: Navigating through availability crises

Irregular availability and its impact on purchasing strategies in logistics.

Experts discuss how crises shape the behaviour of buyers and what adjustments are necessary for success.

Simon Kirchner
Tchibo GmbH

Host

Gina Friese
SIRUM

**LOGISTICS
SUMMIT MAIN
STAGE**
PANEL
DISCUSSION

11:45 Paths to the top: promoting young women in the logistics industry

How can young women be effectively supported on their way to becoming managers? Insights are provided and potential strategies for promoting women are discussed. These include mentoring programs, network building and skills development to provide women with targeted support on their career path.

Timo Esleben
Takko Fashion

Katrin Pompe

STAGE**

12:30 Lunch break

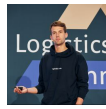

Enjoy the food and make new contacts with the visitors and exhibitors at the Logistics Summit.

**LOGISTICS
SUMMIT MAIN
STAGE**

 PRESENTATION

14:00 Logistics Summit Startup Awards, Part 1

Innovative start-ups present their new and smart solutions for logistics. The best three will receive a Logistics Summit Startup Award - you vote!

Dr. Philipp Hüning
Logistikbude

Host

Steffi Landerer
Trailblazer Summits

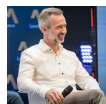

**LOGISTICS
SUMMIT MAIN
STAGE**

 PRESENTATION

15:00 What if employees suddenly became actively involved in the topic of leadership?

Managers receive regular training on the topic of leadership. Everyone has an idea of what strategy to use in the team to get the best possible results. The catch is that not everyone is equally good at taking employees on an appropriate journey as part of “day-to-day” leadership or communicating what exactly the manager is trying to achieve with their behavior.

Employee Integrated Leadership: Managers actively involve their employees in the topic of leadership. Specific goals are discussed. How these are to be achieved. What requirements the manager has of the employees. In return, the employees explain what they expect from leadership. Under what conditions does each individual achieve the best possible performance. Together, a corridor is created in which maximum efficiency can be achieved in the work process.

Thorsten Peter
FIBRO

11:30 smartSim 3D: The intelligent solution for seamless digital commissioning

smartSim 3D is a powerful tool for the digital commissioning of logistics processes. It provides a virtual environment in which developers can test and debug processes before they are connected to a PLC (programmable logic controller). This innovative solution helps to reduce implementation effort, improve the test environment and enhance the overall customer experience.

09:30 2025: The commercial breakthrough of autonomous trucks in logistics

Autonomous trucking is no longer a vision of the future - it is a business reality. After a decade of development and testing, we are at a crucial turning point in the industry. This keynote will provide logistics decision makers with strategic insights on how they can work with their innovation partners to successfully transition from prototyping to industrialization and prepare their infrastructure for the next 30 years. This session goes beyond technology - it's about transforming the entire business model. Logistics decision makers will gain key insights on how to scale autonomous solutions today and make the right infrastructure decisions for the future.

 PRESENTATION

15:00 M2X: Further standardisation in the field of AGVs in addition to VDA 5050

When implementing AGVS projects, companies fail due to high integration costs and time expenditure.

There is a lack of standards, which means that AGVS are still customised solutions. As VDA 5050 shows, companies are demanding simple solutions that can be implemented quickly.

The M2X project is an open source initiative that standardises AGVS interfaces in cooperation with industry and users.
