

Agenda Day 1

11.10.2023 MAIN STAGE

MAIN STAGE

08:30 Welcome

The doors open at 8.30 am - so you can start networking over your first coffee and find yourself a good seat.

MAIN STAGE

09:15 Welcome

(Vortrag auf Deutsch)

Opening ceremony of the event with a warm welcome from the organizers.

Hannah Wesseloh
Logistics Summit

Anja Marte
Logistics Summit

Hendrik Kempfert
Logistics Summit

MAIN STAGE

09:30 Shaping an Aftersales Logistics Network from scratch

(Vortrag auf Deutsch)

Anton Haltenort
Daimler Truck

Moderation:

Steffi Landerer
Logistics Summit Moderatorin

MAIN STAGE

10:00 Coffee break

MAIN STAGE

10:30 Keynote

(Vortrag auf Deutsch)

Moderation:

Steffi Landerer
Logistics Summit Moderatorin

MAIN STAGE

11:00 Discussion Among Intralogistics Experts

(Vortrag auf Deutsch)

How do logistics managers of leading companies take intralogistics to the next level using modern hardware and software, and which hype can perhaps be avoided?

Jens Euringer
Rewe Group

Bernd Sonnenschein
Paulaner Brauerei Gruppe

Christian Körner
OCEANSAPART

Moderation:

Carl-Friedrich zu Knyphausen
Knyphausen Logistics Consulting

MAIN STAGE

11:45 Logistics Transformation

(Vortrag auf Deutsch)

How can new digital tools, services and technologies help logistics to achieve better results and become more efficient? A discussion between experts about the topic of digitalization and technologies in logistics.

Hanno Brümmer
Covestro

Jana Zimmer
Merck Life Science

Tobias Rasch
Dachser

Miriam Kröger
Strategy&

Laurin Stindt
Airbus

Moritz Berger
Schenker Deutschland

Moderation:

Karsten Keil
Schnellecke

MAIN STAGE

12:35 Lunch break

Enjoy the food while making new contacts with visitors and exhibitors at the Logistics Summit.

MAIN STAGE

13:30 Logistics Summit Startup Awards powered by BLG, Part 1

(Vortrag auf Deutsch)

Innovative startups present their new and smart solutions for logistics. The best three will receive a Logistics Summit Startup Award - you vote!

Felix Dossmann
Grünfuchs Logistik

Matthias Rothfuchs
Baitech

Dr. Philipp Wrycza
Logistikbude

Moderation:

Johannes Schirmer
BLG LOGISTICS GROUP

MAIN STAGE

14:15 **Logistics leaders' panel**

(Vortrag auf Deutsch)

Logistics chiefs from leading companies discuss the current challenges in their respective industries.

Adrian Osan
HelloFresh

Dennis Stein
Fraport

Ekine Aristizabal Tolosa
Siemens

Katharina Unfug
E.ON

Michael Schmidt
YOGI TEA

MAIN STAGE

15:00 **Sustainability in Logistics**

(Vortrag auf Deutsch)

How can and should logistics contribute to companies operating more sustainably in the future? How can we improve the image of logistics as an environmental polluter and become more sustainable?

Doris Diebold
hey circle

Steffen Obermann
ZUFALL logistics group

Lutz Fricke
MOSOLF

Moderation:

Tara Dunn
ERM

MAIN STAGE

15:45 **Coffee break**

Enjoy your coffee and cake while making new contacts with visitors and exhibitors at the Logistics Summit.

MAIN STAGE

16:00 **Logistics Summit Startup Awards powered by BLG, Part 2**

(Vortrag auf Deutsch)

Innovative startups present their new and smart solutions for logistics. The best three will receive a Logistics Summit Startup Award - you vote!

Victor Splittgerber
WAKU Robotics

Andreas Rinnhofer
INN ovativ

Moderation:

Johannes Schirmer
BLG LOGISTICS GROUP

MAIN STAGE

16:50 Road Freight Disruption

(Vortrag auf Deutsch)

What will affect the road freight sector in the future? - Discussing the major industry trends with representatives from industry leaders.

Gerd Röttger
inTime Express Logistik

Holger Schneemann
DHL Freight

Monja Mühling
Smartlane

Nicholas Minde
Kuehne+Nagel

Moderation:

Philip John Mordecai
Orbit

MAIN STAGE

17:35 Keynote Fraunhofer IML

(Vortrag auf Deutsch)

Jennifer Beuth
Fraunhofer IML

Kira Schmeltzpfenning
Fraunhofer IML

Moderation:

Steffi Landerer
Logistics Summit Moderatorin

MAIN STAGE

18:00 Logistics Summit Awards Ceremony 2023

Using our app, every attendee at the event has the chance to vote for the best speaker over the course of the day. The three with the most votes will be awarded a Logistics Summit Speaker Award.

MAIN STAGE

18:15 Logistics Summit AFTERSHOW LOUNGE

Drinks and networking for all participants

MONT BLANC

11:30 **Logistics moves goods AND people**

(Vortrag auf Deutsch)

Logistics - that's people. A large part of value creation is still controlled, influenced and operationally delivered by them. This fact is often given too little attention in the digitalisation of logistics processes. Technologies, topics around artificial intelligence and various cases around automation and IoT determine the debate. This discourse is right and important. However, any outcome has to be tested on people, who are the driving force in today's logistics based on division of labour, as well as on the basis of the prevailing processes in the company, its procedures and organisational framework conditions. An appropriate approach to the introduction of digital logistics solutions in conjunction with the associated transformation processes is therefore of particular importance. How this can be achieved is the topic of the speech.

10:45 Sustainability beyond Greenwashing and Greenwishing - How logistics can provide an impetus.

(Vortrag auf Deutsch)

Net-Zero. CO2footprint. Emission reduction. Sustainability goals, sustainability reports and small nature-related advertising company films are fired from all pipes. When it comes to the quantity of sustainability goals formulated in a media-effective way, then humanity should very soon have completed the transformation to a more sustainable way of producing, consuming and living in general. So, everything is green in the economy. Unfortunately, we also live in the age of greenwashing and greenwishing. Intoxicated by their own Net Zero incense, the sustainability apostles strut through the church of the gullible with the CO2 targets as a monstrosity. But the good news is: the age of greenwashing and greenwishing is coming to an end. Painting yourself green hasn't been a USP for a while. In addition, the number of those who expose greenwashing methods is increasing. The next evolutionary step in terms of sustainability is not only just around the corner, but has already begun. So how do we emerge from this age, without brandishing the morale club, losing pride in what we have achieved so far, and now complete this transformation into truly sustainable action? A large part of the emissions are in the supply chain. Logistics as a discipline is therefore an integral part of the overall emission and consequently it should also play a central role in any sustainability strategy, which it does not always do for the time being. Ecosystem thinking, open innovation, collaboration, but above all the collection and sharing of data are the impulses that can, maybe even have to, be set.

14:30 Networked logistics: how digital collaboration works successfully in practice and creates transparency and efficiency in the supply chain (Vortrag auf Deutsch)

How can you share only the transport data needed for transparency in the supply chain? Having transport data available in real time on different platforms is the prerequisite for transparent logistics and delivery processes. Digital networking of all participants along the supply chain creates the required transparency and, at the same time, ensures greater efficiency. With the TrailerConnect® Data Management Center as a central platform, the transport data of your fleet is shared with third parties on an order-related basis without releasing data from the entire freight forwarding network. Find out in the Masterclass with Søren Danielsen how the TrailerConnect® Data Management Center is used in practice and how you can increase efficiency in everyday transport operations.

15:15 ZF shows you the future of road transport and how telematics and digital services need to evolve to be more efficient, safer and sustainable in the fleet

(Vortrag auf Deutsch)

In this presentation, ZF Commercial Vehicles Solutions will set out its vision for the future of road transport. The focus will be on how telematics and digital services need to evolve to improve fleet efficiency, safety and sustainability. The presentation will provide insights into the key trends and challenges facing the industry and highlight the role of technology in addressing these issues. Attendees can expect to gain a better understanding of the opportunities and benefits of telematics and digital services in commercial vehicle fleets, as well as the importance of sustainability in shaping the future of transport.

13:30 Efficient sorting- and order fulfilment to serve your customers.

(Vortrag auf Deutsch)

Sorting systems for Post and Parcel delivery are very often hot topics, especially since the corona epidemic, lots of news is about double-digit growth figures and large Sorting systems at new Post & Parcel Sorting centers. However, for the internal order processing and shipment consolidation, sorting systems could be a very interesting and efficient solution, even in combination with well-known automated storage and commissioning systems, this simple and clear technology could raise the advantage of an automated warehouse.

14:15 **AI in logistics: Do you still make decisions yourself or do you already let decisions be made?** (Vortrag auf Deutsch)

Every day, each of us faces with 20,000 decisions. Starting with the simple decision of what to wear today, to the fastest way to get to work, to how to complete work assignments on time. Every 3 seconds we make a decision and each of them costs us energy. Psychologists speak of "decision fatigue". In the increasingly complex world of logistics, right decisions must be made from the flood of data and information. Hardly feasible without software support. Let intelligent optimization software make the logistics decisions for you and save your energy for the really critical decisions. In our presentation, we will show how optimization software based on AI and OR supports plant logistics through digital decision making, from delivery to the complete yard management processes to dispatch.

15:00 AI-power for efficient logistics operations

(Vortrag auf Deutsch)

Meet Martin Schmitz, a seasoned professional with a wealth of experience in the field of intralogistics. Currently serving as the Director of Sales and Business Development at Nomagic, an innovative Robots as a Service (RaaS) company revolutionizing warehouse automation. Martin's extensive career spans over a decade, with a proven track record in driving sales and implementing cutting-edge solutions. Martin served as the General Manager at Hahn Group, where he gained invaluable experience in managing teams and overseeing the entire spectrum of automation and robotics. Prior to his role at Hahn Group he spent more than 12 years as a leading sales manager at Swisslog Logistics Automation, a renowned company specializing in providing state-of-the-art automation solutions for warehouses worldwide. This comprehensive background has equipped him with a holistic understanding of solution finding, system planning, and process optimization within the industry.
